

## ABSTRACT OF THE DISCLOSURE

To provide an information providing system which can easily and quickly provide information about suppliers.

5       The system includes a map database storing  
supplier information and map information about  
suppliers after linking them, a record database storing  
the sales record about suppliers, and a database  
storing the sales information about suppliers. By  
10   inputting a condition, information satisfying the  
condition can be retrieved from each database and  
provided.
